Youth STEM Programs

SNAPOLOGY

Through the use of popular topics like Minecraft, Star Wars & Superheroes, students are engaged a variety of theme focused activities while learning engineering and math principles.

Snapology's goal is to put purpose to their building through blueprinting and idea sharing. Our themed programs use LEGO® bricks, KiNex and other interactive building toys to engage children and spark their creativity. Each session has a different theme, see online descriptions for each!

HOW COOL IS THAT?

Is your young scientist or engineer ready to go beyond the textbook and begin to understand, apply and excel at the Science and Math concepts they are learning in school? Our 100% hands-on approach encourages kids to use Science and Math for real world applications. Each class, students will build a new machine using different concepts such as: electricity, magnetism, hydraulics, wheels and axles, gears, push-and-pull forces, and many more. Students take home many of the items they make. Our goal is to make Science and Math real while encouraging students to have fun!
